The safe, natural and effective way to look and feel years younger.

1 Facial Rejuvenation Acupuncture

Also known as natural Botox, or acupuncture face lift, this cutting edge technique uses tiny, painless acupuncture needles to improve muscle tone and dermal contraction of the face to decrease sagging and jowls.

It also increases collagen production to help reduce fine lines and wrinkles, moisturizes the skin, tightens pores, and reduces puffiness and bags under the eyes by increasing local circulation.

2 IV Vitamin/Antioxidant Therapy

Highly effective absorption of vitamins and antioxidants such as vitamin C and glutathione to slow the aging process, protect and nourish your cells on the deepest level. Boosts energy and your immune system too!

3 Supplementation

Increases levels of skin protecting antioxidants on a daily basis. Moisturizes and lubricates skin, muscles and joints from the inside out using professional grade essential fatty acid oils. Decreases the fatigued appearance often seen with advancing age.

4 Clinical Nutrition

Feel and look better by eating right for your blood type or constitution. Increase specific foods that help you maintain that youthful glow, and avoid the foods that create inflammation, stress, and free radical damage in your body.

5 Creams/Serums

Reduce the signs of aging and maintain supple glowing skin. Avoid the drug store wrinkle creams that often contain harsh substances such as alcohol, fragrances, preservatives and other chemicals.

See The Difference

- Improve collagen production and muscle tone
- Reduce bags and sagging tendencies – fill out sunken areas
- Eliminate fine lines and diminish larger wrinkles
- Reduce double chin, sagging neck and lift drooping mouth and eyelids
- Eliminate edema puffiness, and bags under the eyes
- Tighten pores and brighten eyes
- Increase local blood and lymph circulation
- Improve facial colour, provide more radiance to the skin
- Reduces stress, promote health and well being
